PROFESSIONAL SUMMARY:

Full Stack Developer specializing in the MERN stack and real-time applications. Built and deployed production-grade systems used by **500+ users**, including LMS, CMS, and an AI-powered exam generator. Experienced in Docker, WebRTC, and scalable backend architectures, with a strong focus on performance, automation, and user-focused solutions.

TECHNICAL SKILLS:

Languages: JavaScript, Java, Python, SQL, C, C++, PHP
Frontend: React.js, Redux Toolkit, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, REST APIs
Databases: MongoDB, MySQL
DevOps: Docker, CI/CD, Kubernetes, Microservices
Real-Time & Messaging: WebRTC, Socket.io, Redis, RabbitMQ
Tools: Git, GitHub, phpMyAdmin, MySQL Workbench

WORK EXPERIENCE:

Full Stack Developer Intern — DiyaproSoft, Bengaluru Demo Mar 2025 – Jul 2025

- Engineered and deployed a scalable **College Management System (CMS) and LMS** used by **500+ active users**, streamlining attendance, exams, and student workflows.
- Automated manual attendance processes by building a full-stack attendance platform, significantly improving operational efficiency.
- Developed Exam Craft, an AI-powered question paper generator, eliminating manual MS Word–based paper creation.

Built multiple production-grade MERN applications with focus on performance, scalability, and real-time functionality.

PROJECTS:

LMS — Full Stack Online Examination System (500+ Users) Demo | GitHub
Tech Stack: React.js, Node.js, Express.js, MongoDB, Python, **MVC Architecture**

- Built a secure online examination platform used by **500+ students**, replacing Google Forms–based exam workflows.
- Implemented live exams, automated evaluation, and instant result generation.
- Designed scalable MVC architecture ensuring reliability during peak usage

StreamX — Real-Time Video Streaming Application Demo | GitHub
Tech Stack: React.js, Node.js, **WebRTC, Socket.io**, MongoDB, **MVC Architecture**

- Developed a real-time video communication platform using **WebRTC**.
- Implemented low-latency peer-to-peer streaming and signaling with **Socket.io.**
- Optimized connection handling for smooth real-time communication.

PulseChat — Real-Time Chat Application Demo | GitHub
Tech Stack: React.js, Node.js, Socket.io, Redis, RabbitMQ, Docker

- Built a scalable real-time messaging system supporting instant communication.
- Implemented microservices architecture with Redis caching and RabbitMQ queues.
- Containerized services using Docker for consistent deployment.

ExamCraft – Full Stack AI Question Paper Generator Demo | GitHub
Tech Stack: React.js, Node.js, Express.js, MongoDB, **MVC Architecture**

- Developed an AI-assisted exam paper generator for faculty usage.
- Automated question selection and paper formatting workflows.
- Reduced manual paper creation time significantly.

ICA — Full Stack Attendance Web Application Demo | GitHub
Tech Stack: React.js, Node.js, Express.js, MongoDB, Python, **MVC Architecture**

- Built a real-world attendance system replacing slow manual tracking.
- Implemented secure APIs and real-time updates for staff workflows.
- Improved accuracy and speed of attendance management.

EDUCATION:

B.Sc. Computer Science — Islamiah College | **GPA: 8.79** Jul 2023 – Apr 2026
Class XII (HSC) — Islamiah Boy's Higher Secondary School — **88.39%** June 2022 – Apr 2023
Class X (SSLC) — Islamiah Boy's Higher Secondary School — **78%** June 2020 – Apr 2021

POSITIONS OF RESPONSIBILITY:

- Coordinated technical development during internship, ensuring timely delivery of core modules.
- Led end-to-end development of CMS, LMS, and ExamCraft systems.
